MINING, BUSINESS AND STOCKS.

CREAT VEINS OF SCOTT MOUNTAIN

Report of Prof. Clayton Made 25 Years Ago.

DECLARED LOCALITY RICH.

ate Developments Proving That Theory of Mineralogist Was Well Founded.

A quarter of a century ago, in 1876. rof. Clayton, a well known mineralorist, made an exhaustive examination of the camp of Park City and after ompleting his observations, wrote a etter to the late R. C. Chambers, who hen, and until his death nearly a year ago, was superintendent of the Ontario nine. The professor gave it as his pinion that some of the largest ore odies in the district would be opened ip on Scott mountain. Late developents in that part of the camp indiates that his beliefs were well foundd. The Comstock, California and Scottish Chief mines are in the locality poken of so favorably and each of them shows improvment as the work. of exploration progresses.

Prof. Clayton, as is well known, died rom the effects of an injury received by having been thrown from a wagon in Idaho, many years ago.

A copy of the letter referred to was

the possession of H. V. Edwards, a olorado mining man, who recently ent it to his friend, James M.Kenneny, an old timer in Park City, now a resi-tent of Salt Lake,

"The largest ore bodies belonging to be great mineral zone of Park City strict, lie in the Scott Hill mountain, st of Thaynes canyon and south of on canyon; lying between the granite rmation on the south, and the quartite on the north, running southwest-"The large ore bodies are deeper from

e surface than those of the Ontario ne and more extensive, as the forma ensive on the surface than the formaodies will be round west o Chaynes canyon, and at a greater lepth than those in the vicinity of the Ontario; as the apex of the country is ower and showed the stratification lain as the surface has been scored d eroued off, leaving the mineral ex-sed on the surface where the formaially adjoining the quartsite for-

'This great mineral belt extends in a direction from the Ontario summit, at the lakes to the Scott at the lake and has been thrown southeasterly on account of the large porphyry dyke, which extends north-asterly direction towards the Provo iver. Extensive ore bodies will be disextensive as in the southwestern po-tion of the district, on account of the arbed condition of the countr This part of the district will devel ery slow as it will take a larg imount of capital, being that the sur ace covers the mineral very deep ex cept on a certain portion of the Sco Hill, where the large ore bodies force the mineral to the surface, which is a grade, carrying large amount of zin which at some future time will be va uable. The zinc capping on the le a great mass at the surface, shows great permanency for large ore bodies beaeath. This mineral belt extends six miles in length and one mile in width in places. At a depth large bodies of copper and gold ore will be found." On the advice contained in this letter Mr. Chambers became interested in the locality referred to and his heirs still hold extensive interests.

STOCK MARKET WEAK. This Was the Feature of This Morn-

ing's Call on 'Change.

The mining stock market was weal today. With the possible exception of Daly-West, which held up to Satur-day's quotations; the others had a tento go lower, Grand Central opendency to go lower, Grand Control ed at \$4.85 and closed 5 cents per share lower; 600 shares went at 76 cents when that stock was called, but it de ned to 69¼ and was passed. Fo S. Mining \$22 was bid, but no one had any to sell at that figure. Century held close to Saturday's quotations Wabash came forward in a disipated condition. The highest price paid for the stock was 59 cents and it wavered between that point and 56 cents, rally ing slightly at the close to 56% cents.
On the open board New York Bonanza
was picked up at 37% and 38 cents and
32 shares of Daly-West was let loose
at \$40.50. The quotations and sales posted at

IN BEAVER COUNTY CAMPS. Concerning the Moscow Purchase.

Further information concerning the

Burning Moscow deal which was

during the week, indicates that one of the most important mining enterprises in Beaver county is assuming tangible shape. The option on the Barrett interests in the Burning Mozcow was taken by the Wild Bill contany, recently organized at Salt Lake George S. Hays of Park City is president of the company, and the Rives brothers are among the directors. The option calls for the payment of \$35,000, the sum of \$5,500 to be paid within 30 days, and \$5,500 every 90 days. thereafter. The company had previously taken a bond on the Cullen interest in the Moscow and on the Wild Bill and other claims owned by Mr. Cullen. This bond calls for the payment of \$50. 000, of which \$25,000, it is stated, goes for the Wild Bill. It will therefore require \$55,000 to complete the purchase of all the groups, and it is given out that the company has \$100,000 in the treasury with which to meet the pay-

The Wild Bill and the Moscow are classed among the very best silver-lead properties in Beaver county. Both have large bodies of good ore exposed—ore that could be shipped at a profit, even under the present low price of silver. However, it is reported that the company's plans include the erection of a smelter at Shauntle, on the very spot wher a smelter was operated a genera-tion ago, which will handle all the ores of the Wild Bill mines, as vell as those from other properties. This will enable a large number of properties that have been idle or years to resume opera-tions, and the Shauntie section will ugain become famous.

For a year past the Rives brothers have ben seeking a foothold in Beaver county, and their success in rounding that they have put in their time to good advantage.—Beaver News.

Grand total 4,534,660 INTERNATIONAL COPPER. Work is to be Pushed on This La Sal Property.

Provo, Dec. 29.—Atty. Samuel A King, president of the International Copper Mining company, which owns several valuable claims in the La Sal informs the "News" representotive that his company will at once put a force of men to work on its pro-perty under the management of Mr. L. Antles, an experienced mining man. Considerable work has been done on the company's holdings, with very en couraging results, and work will be pushed from now on until the property

Special Correspondence.

is developed into a producer, JOHNNY MILL READY. Steam Will be Up in New Plant To-

Reports received from Stateline to-

day state that the new milling plant at the Johnny mine is ready for the fires. and it is expected that before another 24 hours passes steam will be up. Manager Will J. Dooly is expected to arrive in Salt Lake this afternoon from California, where he went a few weeks ago upon a sad errand-that of attending the funeral and interment of his only brother, the late N. P. Dooly. It is expected that he will rest up rom his journey a day and leave for he mine tomorrow evening. He will be accompanied from here by Pat Sheahan, who is to assume charge of the plant as superingendent. Contractor Burkeo f the rm of Dederich & Burke, who attended to the construction, will also accompany the party and will see hat the machinery is in perfect runuliding and its contents over to Man

The new Johnny mill is one of the best n the state. It is a combination amai-camator and cyanide plant, having a eaching capacity of 50 tons per day. It is equipped with 10 stamps and so aranged that another 10 can be added

ithout difficulty. It is the intention to start up regu arly on New Year's day, thus begining 1903 with an important bit of his-ory for the Stateline district.

The tailings at the old mill just be ow the Johnny property are to be run through the leaching department at once. This plant was used at one time by the Johnny company and from it was produced the first bar of gold builton from this great mine. Being equipped with plates only a larger region of the values vent off in the tailings.

MUSIC TEACHERS.

All who desire to consult the list of the representative professors and music teachers of Sait Lake should read the "Musicians' Directory" in the Saturday "News."

MARVELOUS **GOLD SAMPLES**

Seymour H. Bell Brings Startlingly Rich Specimens to Salt Lake.

COME FROM EAST OREGON.

Found Far Underground and Assay \$310,000 to the Ton-What Is Going On in the Region.

Seymour H. Bell, who installed and owned the electric light plant at Sumpter, Oregon, and controlled the Baker City Gas & Electric company, of which he disposed in order to devote his attention to mining, is down from the famous eastern Oregon gold camp. He s domiciled at the Knutsford and has with him some of the finest gold quartz specimens ever seen by human eyes, and they were not picked up on the surface of the ground either,, but come from 500 to 1,275 feet underneath the surface. It is almost bewildering when one thinks of assays going \$310,000 to the ton, and yet they do.

Mr. Bell brings the latest news about what is going on in the Sumpter district, and inasmuch as many Salt Lakers are interested there, the news will no doubt prove interesting. He says the new Golconda company, headed by J. H. Robbins, the well known banker, who took hold of this property les than a year ago when it was dis-credited and said to be worthless, are putting in a sinking plant which will enable them to go down 1,000 feet-and at the same time are operating a 20 stamp which is grinding out \$22,000 per

The new North Pole mill of 20 stamps making 30 stamps in all, will be drop-ping on ore by Jan. 1. This mine alone, which is owned by Alexander Baring of London, produced this year with a of London, produced this year with a 10 stamp mill over a million dollars. It was bought by Mr. Baring a few years ago for \$10,000. In its number 4 tunnel at a depth of 1,275 feet below the surface it has one ore chute 670 feet in length, which it has been estimated has five millions in sight. The South Pole in its number 3 tunnel is in a fine body of ore at 1,000 feet.

The Columbia is building a large

The Columbia is building a large power house and preparing to sink deeper, and the Mammoth, which has been a good mine but was thought to have pinched out, has found six feet of ore in a cross-cut at the 400 foot level, which is of a fine milling quality and runs from \$14 to \$17. The new smelter now being built at Sumpter, with a capacity of 250 tons, is employing 150 men and will be ready for operation by spring.

The town of Sumpter is booming and all the hotels are crowded, and everybody is making money. And yet this is the district which less than 10 years ago was turned down by the late Clarence King and other well known mining experts. It was not outside capital which brought this district to the front and made it what it is, but a few men like J. H. Robbins who had the courage of their conviction and foresight to stay with it and they are now reaping a harvest from what they have sown. The Imperial in Cable Cove district, owned by C. W. Nibley, and the Victor in Red Boy district, owned by W. H. Tibbals, both Salt Lake men, are looking well. Mr. Bell will return to eastern Oregon in a few

IN GOLD MOUNTAIN. Snow is Unusually Deep for This Time of Year.

Gideon Snyder, postmaster, and one of the leading men of Kimberly, is in the city today. He states that an un-usual amount of snow has fallen in the Gold Mountain district, much more, he declares, than has been seen at this season of the year in a long time. The snow is not so deep, however, that it interferes with operations at the mines. The farmers of the Sevier va'-ley, of course, are very jubilant over the heavy fall of the beautiful, thus in suring them of a good supply of water for their lands next summer.

MINING CONCENTRATES.

Foreman McDonald of the Little Bell mine of Park City reports that the shaft in that property is now down to a depth of 420 feet. Upraising and drift-ing from the 300 level is in progress.

According to the Park Record a large consignment of track iron, piping and other supplies has arrived at the Naildriver property.

Andrew J. Malloy, one of the promo-ters of the Bingham New Haven enterprise, departed for the east

The Groesbeck-Whitney Transvaal Mining company, with headquarters at Springville, has added two claims to its Tintic holdings. Judge W. A. Sherman expects to de-

part for Nevada camps again shortly.

James T. Fulton and E. W. Griffiths departed today for Nevada on mining On Monday the Golden Gate mill

made the biggest run in its history. Although the mill is only 1,000 tons capacity, the enormous amount of 1,600 tons were but through in 24 hours .-

Manager A. J. McMullen of the O. K Extension mine in Beaver county de parted for the south last night. F. H. Lathrop, who, along with sev-

eral others, has a bond on the Was-atch mine in Beaver county, departed for camp last night. John Dern, president of the Con. Mercur, departed for Nebraska this morning and will be absent about ten

Supt. C. T. Mixer of the Creole mine of Park City is in town today.

Solon Spiro has returned from a trip to Portland, Oregon. Supt. Harvey D. Trenam, of the Ben Harrison mine, in Beaver county, will

depart for the diggings tomorrow. John Meteer, of Richfield, is in town today. He states that good progress is being made with the development of the mines in that part of the state.

SAM NEWHOUSE MAKES HIS REPORT

About Boston Consolidated.

DOCUMENT READ IN LONDON

Amount of Ore Blocked Out in Mine Is Placed at 658,060 Tons, Which Will Net 82,632,240.

The annual shareholders' meeting of the Boston Consolidated Copper and Gold Mining company is scheduled to take place at the London headquarters of that corporation today. At this meeting the report of managing Directo Samuel Newhouse, covering the physical condition of the big Bingham Ronanza will be read. The report was also made public in Salt Lake today and contains much interesting information. A noteworthy feature of the document is the statement that in the mine is blocked out a body of ore containing 658,0.60 tons, which it is claimed, at the present price of copper, will yield, after deducting all expense of mining and

At the beginning of Mr. Newhouse' report he states that the management is no longer struggling with a prospect with its alternate hopes and fears; but that the shareholders can content themselves with a large paying mine with a long period of profitable busi-He then tells of the developments in

smelting, a profit of \$4 per ton, or \$2,-

632,249.

the mine during the past year and the DEVELOPMENT WORK DONE.

"We have driven tunnels, crosscuts, drifts, raises and winzes aggregating 6.771 feet at the low average cost, in-cluding all office and general expense, of \$11.20 per foot. We have also added to the 100,000 tons of ore mentioned ia my last annual report, as the of the year's exploration underground, ore reserves as follows: Peabody and work tunnels, tons, copper, 3 per cent; gold, \$2.15; silver, 1 ounce. Armstrong tunnel, 141, 557 tons, copper, 3 per cent, gold, \$2.55

Peabody and work tunnels, 183,451 tons, copper, 1.7 per cent; gold \$1; silver, 1 ounce. Armstrong tunnel, 47,032 tons, copper, 1.2 per cent; gold \$6 cents; silver, 1 ounce, Peabody and work tunnels, 173,061

tons, copper, 1 per cent; gold \$1.60; silver, 1 ounce. Armstrong tunnel, 57 112 tons, copper, 1 per cent; gold, \$1.70. ellver 1 ounce. CAN SUPPLY 500-TON SMELTER.

"There is enough of the higher grade of copper and gold ore in sight to sup-ply a smelter with 500 tons per day continuously for a period of five years. The ore which at the present time shows low grade copper value would not be taken into account were it not that in the Higrland Boy mine of the Utah Consolidated, these values in-crease to a payable shipping ore in the stopes extended from the levels in which it is first encountered, and in our properties exactly parallel results are shown in the raises and winzes from shown in the raises and these low grade ore bodies. In the active extraction of these ores, the higher grade bands frequently encountered in the same bodies of ore will bring the

average up to payable grade.

"I have made a careful estimate of the value of the ore in sight, based or an actual showing in the mine at the present time, eliminating from my calculations the 461,656 tons containing less than 3 per cent copper, and add-ing the 100,000 tons mentioned in my last report, we have 658,000 tons blocked out, which, at the present price of copper, after deducting the cost of mining, shipping and smelting, will yield a profit of \$4 per ton.

ORE BODIES TO DEVELOP.

"While our operations during the year have been productive of very sat-isfactory results, I consider that we are yet upon the threshold of our discoveries. We have a large area of ground which is wholly unexplored. I expect that the result of future operations will far surpass anything disclosed at the mine at the present time. One reason for this belief is that in the work tunnel where we thought we had reached the limit of our ore body, we have during the past fortnight driven forty feet feyond our supposed limit through ore which averaged 8½ per cent copper, and we are still exacading these workings through a good grade

"During the coming year the directors should consider the question of se-curing the best method of transporting the ores from the mine to a smel ter, also the erection of a smelter at some convenient point, having in view modern plant for the reduction of

ores at the lowest cost.' During th year the January mining claim was purchased at a cost of \$1.100; a compressor at a cost of \$12,696; a commodious boarding house was con-structed at an expense of \$5.387 and expenditures were made for other equip-ment and supplies to the amount of

------NEW YORK METAL PRICES Lead quiet, 4.121/2.

Copper nominally, 11.75,

A RECORD IN WHEAT STACKS.

longest authentic period which a wheat stack has been kept unthrashed is 40 years. The story of this The crop of which the stack was built was grown in 1855. This stack and another belonged to two brothers, both farmers, who lived in the neighborhood of Harragate. In March of the preceding year the Crimean war broke out, and the price of wheat rose by leaps and bounds. Shortly after the stacks were built the price of wheat rose to 97s rer quarter, and at this price one of the brothers sold out. The other, how-ever, determined not to sell until the

In March, 1856, the war terminated and the price of wheat fell. The farmer, however, stuck to his resolution and refused to sell. He kept his stack until 1895, when the farm passed into the hands of the younger brother, thrashed it out. During the whole 40 years of its existence it had enjoyed perfect immunity from rats but had been the abode of thousands of spiders. It yielded 18 quarters of wheat, but the quality of the grain rendered it fit

only for chicken corn.

Probably the oldest oat stack was that which belonged to John Sneller near Dover, which in 1892 was thrashed after having stood for 29 years .-

MOST STOCKS WERE LOWER.

Contains Much Interesting Data Gains Were Sufficient to Make Tone Irregular.

> SCORED DECLINES. PRICES

Buying by Shorts Caused Railles in Leaders but Market Soon Developed Weakness.

New York, Dec. 92.-The majority of stocks opened at lower prices than on on Saturday but there were enough gains to make the tone irregular. In some of the active issues trading was very feverish. Amalgamated Copper, which closed at 63% on Saturday was sold down to 611/2 and rallied feverishly. Anaconda opened up 2 points. Precipitate declines in a few of the speculative leaders brought out large offerings from all quarters and the market gave way sharply. Rock Island broke from 49 to 47 and St. Paul, U. P., Southern Pacific, Atchison, Reading, B. & O., Sugar, Manhattan and a number of stocks increased 1 to 11/2. Anaconda reacted 4 from its opening and a few unimportant stocks were bid up. Buying by the shorts rallied the leaders for a time, but the market developed renewed weakness before 11 o'clock, the transcontinental group declining to the low-

Prices receded all around to a point generally lower than before. One point declines were reached by U. S. Steel preferred, New York Central, Penna., Illinois Central and Missouri Pacic. A rally of more than a point in Sugar steadled the market but St. Paul re-lapsed to below 177. The chief selling was attributed to various pools which are responsible for last week's rise in prices. The rise in call money induced

Bonds were irregular at noon. The decline in St. Paul reached 2½ and other important stocks extended their losses to nearly 2 points. Lack-awanna lost 3. Business had diminished at 1 o'clock and the pressure relaxed. MONEY AND BONDS.
